TECHONOLGY OF USING THE INFORMATION FROM OFFICIAL WEB SITES OF HEIS DURING STATE ACCREDITATION OF EDUCATIONAL ACTIVITIES

The technology of the automated collection and publication of information on official websites of educational organizations in the network "Internet" is under review. The article analyzes the opportunities and challenges of using this information during external review to uphold the decision on the information fidelity and assessment of the accreditation indicators.

Keywords: official web site of an educational organization, external review, state accreditation indicators, assessment of the information fidelity.
